

SOLAR

Better Buildings for a Better World

Entegriety is a sustainability and energy services company specializing in the implementation of energy conservation and renewable energy projects. We are uniquely qualified to deliver innovative and sustainable solutions to optimize building performance.

Entegriety specializes in the development, engineering, construction, financing and operations and maintenance of high-quality solar projects. With the recent cost reductions in manufacturing, installation and equipment costs, solar photovoltaic (PV) are more cost effective than ever before. Entegriety is committed to delivering affordable and intelligent solar solutions to meet the sustainable goals of our education, municipal government and commercial customers.

OPTIMIZED SOLAR PROCESS

With the rising cost of electricity, a solar system investment can ensure against electric utility cost inflation while saving money over the life of the system. Entegriety optimizes solar system economic performance with a strategic approach to project development through five step optimized solar process:

- **Engineering:** The solar system design starts with a detailed site assessment and an analysis of solar panel placement options and a review of historical electric consumption.
- **Procurement:** Once the system is designed, our procurement team sources all system components direct from our network of approved vendors. **Construction:** As a licensed electrical and general contractor, Entegriety is able to provide turn-key installation of our solar systems. Our crews are highly skilled and trained to efficiently install various solar system configurations with the highest quality of workmanship and safety.
- **Financing:** Whether a tax-exempt municipal lease, capital lease, power purchase agreement, or a municipal bond, Entegriety will match your solar project with a finance mechanism that meets your needs.
- **Operations:** Entegriety has an expert team to properly commission all systems upon project completion, continually monitor system performance, and operate and maintain to ensure the system performs at optimum capacity.

QUICK FACTS

42

We've completed projects in 42 states and the Cayman Islands.

100

We have 100 employees in locations throughout the U.S.

8

We're headquartered in Little Rock, AR and have eight offices located across the country.

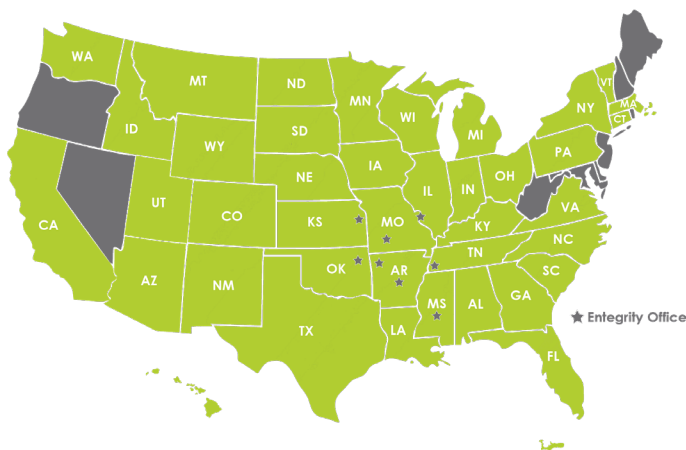

COMPANY INFORMATION

ABOUT US

We help our clients realize long-term energy savings by focusing on their needs: selecting the most cost-effective scope, contract structure and financing strategy available. Our comprehensive service package includes energy savings performance contracting, commissioning, energy modeling, building testing, lighting solutions, renewable energy, water conservation and sustainability consulting.

PARTNERSHIPS & AFFILIATIONS

We encourage our team to be well-versed and actively engaged in our industry. We're a proud member of the U.S. Green Building Council; National Association of Energy Service Companies; American Society of Heating, Refrigeration, and Air Conditioning Engineers; Association of Energy Engineers; Association of General Contractors; AABC Commissioning Group; Air Barrier Association of America; American Institute of Architects; American Water Works Association; Building Owners and Managers Association International; and we're an ENERGY STAR® partner.
